- OS Adaptability: Comfortable working on Linux, Windows, and Mac environments
- Communication Skills: Experience giving speeches and working with small and large groups of people
- Bilingual: Able to speak, read, and write proficiently in both Spanish and English

EMPLOYMENT HISTORY

Chico State AS IT Student Assistant   *California State University, Chico*   06/2017 – Present
- Portal Administrator: Give access to Chico State Faculty/Staff to Research Projects using a terminal based interface.
- Problem Solver: Collaborate with two IT managers to solve technical issues for 15+ offices on campus while maintaining great customer service.

Pepsi Supply Chain Management Intern   *Hayward, CA*   05/2016 – 08/2016
- Supply Chain: Worked alongside the production and maintenance managers to improve the current system for a specific part of the production process that gave their highest downtime on bottle changeovers.
- Management: Researched a software called iAuditor, a mobile application that allows for quick electronic audits. Introduced and trained the application to management including the plant director. Helped improved communication between upper management and lower management. Currently being used.

VSP Global IT Summer Intern   *Rancho Cordova, Sacramento*   05/2015 – 08/2015
- Role: Worked in a team whose main goal was to transition from the companies mainframe system to a better more stable cloud system
- Quality Assurance: Tested Enrollment Verification Reports given by two systems to find bugs that would be fixed by Software Engineers.
